# Prominent Edge

We transform complexity into clarity.

Who we are.

Prominent Edge is a US-based software development firm that builds digital solutions that transform complexity into clarity using proven open source and commercial technologies that best meet client needs.

We are experts at delivering exceptional user experiences across multiple platforms - quickly and efficiently. We pride ourselves in bringing the right expertise, at the right time, for the right duration.

Our Services.

- Web & Mobile
- User Experience
- DevOps & Automation
- Data Analytics & Visualization
- Geospatial
- IT Support

Our Clients.

We service commercial, federal, and public safety clients.

- Airforce
- Centers for Disease Control and Prevention
- Commercial
- Defense Digital Service
- Department of Homeland Security

- Department of State
- Department of Health and Human Services
- Navy
- National Geospatial-Intelligence Agency
- National Institute of Standards and Technology

What we do.

Web & Mobile

Our holistic and agile approach to building digital solutions combines world-class interface design expertise with deep technical knowledge in order to design and architect solutions that are both easy-to-use and highly scalable. Our team is deeply knowledgeable and fluent in a wide range of front-end and back-end web technologies, constantly staying abreast of the latest advances.

User Experience

Our user-centric and balanced approach to building solutions focuses heavily on understanding the user's perspective and objectives. Armed with that understanding, our interfaces are designed to provide a user experience that is not only visually appealing, but also intuitive and streamlined.

DevOps & Automation

Embracing Devops is key to having higher grade software in production. It aligns development, quality assurance, IT operations, and support teams to produce and maintain quality software. At Prominent Edge, our DevOps architects and engineers are highly skilled at building automated, reliable, scalable, and secure infrastructure, whether using cloud or on-prem resources.

Data Analytics & Visualization

Our holistic and agile approach to building digital solutions combines world-class interface design expertise with deep technical knowledge in order to design and architect solutions that are both easy-to-use and highly scalable. Our team is deeply knowledgeable and fluent in a wide range of front-end and back-end web technologies, constantly staying abreast of the latest advances.

Geospatial

Our expertise spans a wide range of both open source and commercial geospatial technologies, with a solid understanding of the advantages and benefits of each. Our objective evaluation of your goals, constraints, and existing systems enables us to offer an unbiased recommendation specifically geared to your unique needs.

IT Support

We provide a complete range of support services that can be customized to meet your project demands and business goals. From business analysis to software delivery and ongoing support, our IT support services span the entire software development cycle. Whether you require end-to-end development or specialized support, our team is here to provide you with the assistance you need.
